

**Patients and their families often have to make very difficult choices when entering hospice care. Not anymore.**

### **We Simplify Choices**

At Hospice of Broward County, we offer patients with life-limiting illnesses “Open Access” – the opportunity to continue medical treatments such as radiation, chemotherapy or transfusions, for example, while receiving our hospice care.

### **We Do Whatever It Takes**

We are committed to meeting our patients and families where they are, doing whatever it takes to care for them and make them comfortable. We provide care for anyone who needs and wants our services, regardless of their age, insurance, citizenship, or ability to pay.

### **Medical Treatments and Hospice Care**

Patients who receive hospice care typically live longer and have a much better quality of life. You no longer have to choose between the physical, emotional and spiritual care of hospice and the aggressive medical treatments that help you feel better. At Hospice of Broward County, you can have both. You retain control over your care.

We partner with your physician and invite them to be a part of your care plan. You continue to receive the medical treatments that benefit you, easing your symptoms or pain.

### **How Can We Offer These Services?**

Because these costly therapies are outside of the current Medicare and Medicaid reimbursement structure, most hospices cannot provide them. As a not-for-profit 501(c)(3) organization, Hospice of Broward County can provide a range of services that other hospices cannot or choose not to offer.

### **Hospice Admission**

Once you and your family have made the decision that you will benefit from hospice care, we are there for you. We come to your home, assisted living facility, senior living facility or in-patient unit. We speak with you, learn your goals, and determine eligibility.

If you are undergoing treatment for a terminal illness, and it is providing you physical comfort, we will continue that treatment.
